Subject: Sequence Search Request App. 10/643,801

Good day folks,

Could I please get the following nucleotide sequence search in App. 10/643,801.

I need a length limited oligomer search of SEQ ID NO: 35 in all standardly searched nucleotide databases.

Please set the lower and upper limits to be 8 and 80 nucleotides respectively.

Please include the first 45 alignments with the dataset (in lieu of the usual first 15).

There is no need to do an interference search at this time.

Thank you very much.

As usual your efforts on my behalf are greatly appreciated!!

jon
